

## Washing machine Type 300

Cleans printing press parts such as ink pans, ink containers, doctor blades and other parts with solvent. Good cleaning results due to an oscillating spraying system with a powerful washing pump. High loading capacity. Installation in an on-site pit for loading at floor level. The washing solvent is kept in a separate tank and the drain container behind the machine is separated from the washing chamber, hence emissions are considerably reduced. The machine can be adapted to various tasks with the appropriate accessories. The washing machine is type-examined and explosion-proof (category 1/2) in accordance with ATEX.

### Dimension:

usable width:	1200 mm
usable height:	1200 mm
usable length:	2000 / 2500 / 3000 / 3500 / 4000 mm

### Items to be washed

### cleaning process

### cleaning agents
